

# THE TISSUE SODIUM STUDY SATISFACTION SURVEY

ARE PATIENTS SATISFIED WITH THEIR RESEARCH STUDY EXPERIENCE?

THE SURVEY WAS ADMINISTERED TO 21 ADULT OUTPATIENTS ON HEMODIALYSIS BY EITHER MAIL OR IN PERSON AFTER COMPLETING AT LEAST ONE STUDY VISIT

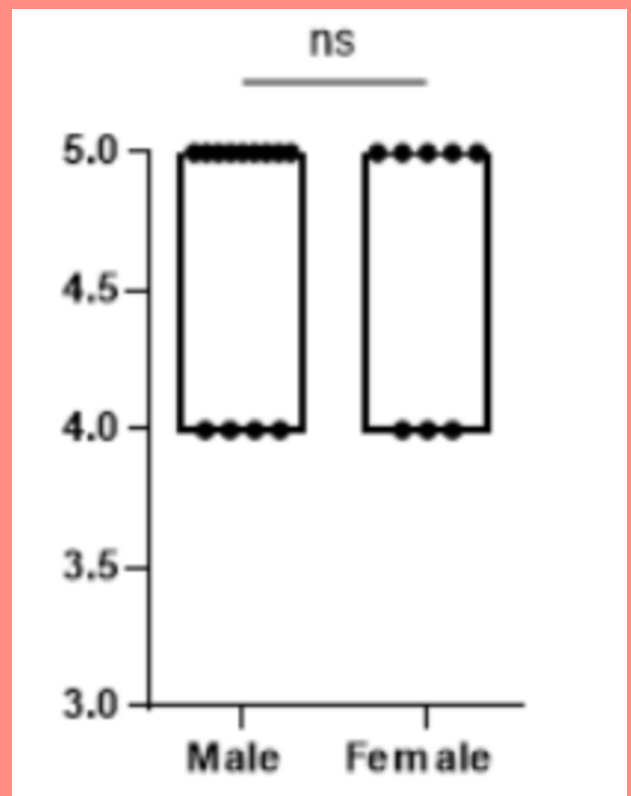

## Responsiveness of study staff

Did the study team address any concerns and answer all of your questions punctually?

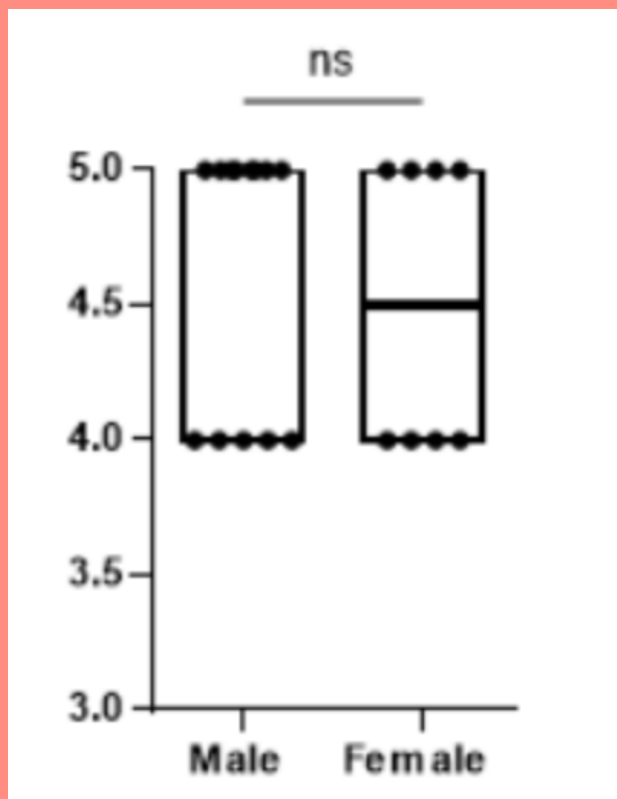

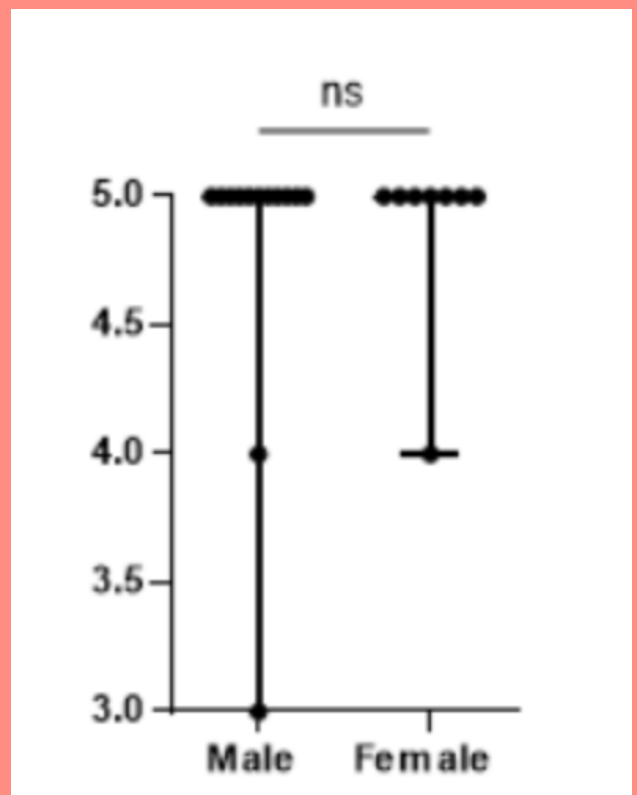

## Flow of the Study Visit

Did the study team know where everything was and could they find things quickly to keep momentum?

## Adequate information sharing

Did you know why you were participating and what the study team hopes to accomplish before giving voluntary consent?

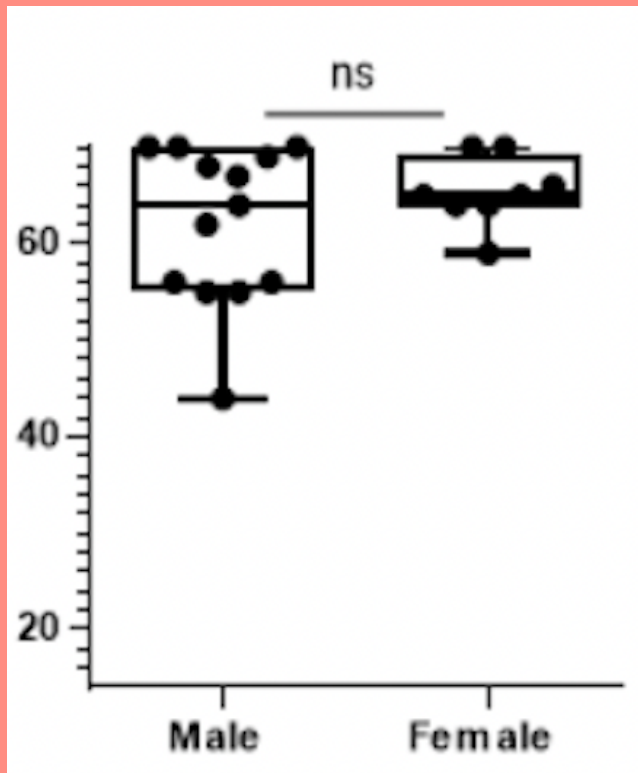

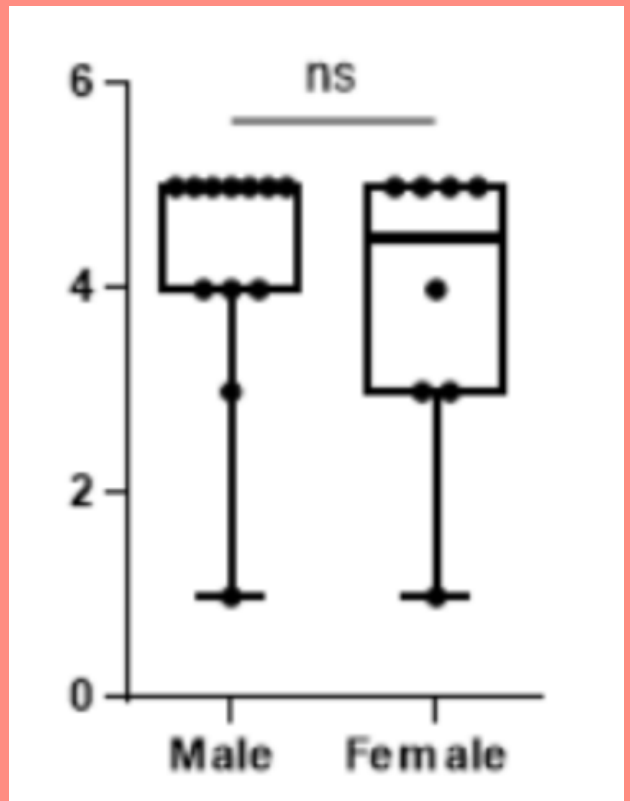

## Health Literacy

Do you have a better understanding of what is a safe level of salt to consume per day and what is too much after the study visit?

# Application of Knowledge

Now that you know your salt levels in your calf muscle, to what extent are you going to modify and monitor your salt intake going forward?

Overall Satisfaction...  
**Very Satisfied!**
